Afzal Ahmed

has successfully completed the online Specialization

Generative AI SQL Database Specialist with ChatGPT

This certifies that the holder has mastered the integration of generative AI with SQL database systems, demonstrating advanced proficiency in using AI to design robust database schemas, generate complex SQL queries through natural language, and create powerful data visualizations without programming. The recipient can implement cutting-edge techniques including database simulation, query optimization, and automated analysis—positioning them as an innovation leader capable of transforming how organizations interact with their data through the strategic application of AI and SQL technologies.

Jules White

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
